(54) TEST METHOD FOR SURFACE WATER ABSORPTION OF PANEL

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a test method, for the surface water absorption of a panel, in which the operability of a test can be increased when the test is made continuously to a plurality of panels. SOLUTION: A frame 1 for test is arranged on the surface 20 of a panel 2, a seal material 10 is arranged and installed between the outer circumferential face 100 of the frame 1 for test and the surface 20 of the panel 2, water 30 is poured into the frame 1 for test, and the water absorption amount of the panel 2 is measured. A tetrafluoroethylene—based sheet or tape 11 is pasted on the outer circumferential face 100 of the frame 1 for test, and a silicone—based sealing material is used for the seal material 10.
